

THE DOCTOR CAN SEE YOU NOW.

Today's healthcare providers are embracing the latest advancements in information and communications technology to not only deliver better patient care, but to also improve hospital efficiencies. By integrating one-way or two-way audiovisual technologies with our high-performance AccessPoint workstations, any hospital can give their patients access to top specialists – anywhere, anytime.

By leveraging TouchPoint Medical's uniquely designed mobile computing workstations at the point of care, these real-time interactions can result in improved clinical decision making, physician satisfaction and hospital reputation, all while reducing costs.

Optimize workflow and maximize essential technology resources.

By leveraging TouchPoint Medical's uniquely designed mobile computing workstations at the point of care, these real-time interactions can result in improved clinical decision making, physician satisfaction and hospital reputation, all while reducing costs.

Clinician Friendly

- Improves access to patients and their data in critical care scenarios
- Decreases travel costs and enables more patient visits
- Provides clinical decision support in emergency situations

Facility Empowerment

- Improves physician satisfaction
- Expands capabilities and enhances reputation
- Generates revenue by better utilizing facilities and on-call staff

Patient Centric

- Improves clinical outcomes
- Accelerates access to specialized care and reduces travel time
- Enables accurate communication through the use of translation services

AccessPoint Telehealth Features

- Large monitors standard with dual monitor option
- One-way and two-way video conferencing technology
- High resolution cameras to review patient condition
- Wireless LAN bridge to enable wireless connectivity
